

## Transport for NSW

# M6 Stage 1

One step closer to starting construction | June 2021

The NSW Government has reached another significant milestone with the announcement of CIMIC Group's CPB Contractors and UGL, in a joint venture with Ghella (CGU), as the successful delivery partner to design and build the M6 Stage 1.

M6 Stage 1 will deliver twin four kilometre tunnels linking the M8 Motorway at Arncliffe to President Avenue at Kogarah and upgrade the intersection of President Avenue and Princes Highway at Kogarah.

### Key benefits

- Motorists will be able to bypass up to 23 sets of traffic lights
- Over 2,000 trucks per day removed from surface roads, improving travel times and air quality
- Over 5,000 jobs created until project completion
- New shared cycle and pedestrian pathways including a new pedestrian bridge across President Avenue.

With CGU on board, the first step is to develop plans on how we will manage the impacts of construction while we build our project.

To help inform our plans we will start preliminary investigation work in July. This work includes geotechnical and utilities investigations and surveying. In the coming weeks we will provide more detailed information on the impacts of this work to those directly impacted.

Over the coming months we will prepare plans to manage issues like noise and vibration, air quality, contamination, traffic and access. These plans will consider our community, stakeholders, road users and the local environment.

The plans will describe the construction methods that will be used to minimise impacts to those who live, work and travel through the project area. You will be able to see these plans on our interactive portal once they are prepared.

## Creating opportunities

M6 Stage 1 will support more than 5,000 jobs over the life of the project. This is in addition to the 200 jobs created for the community recreational facilities upgrades in Rockdale and Brighton Le Sands.

We will provide training and on-the-job learning to prepare a new generation of workers for a future in the construction sector. We also want to increase diversity in our workforce. This means we will deliver training and opportunities to include more women, youth, Aboriginal people and Aboriginal-owned businesses in our industry. As a priority, we are focusing on using local businesses who can provide goods and services to our project.
