

Transport Access Program

Millthorpe Station

Community Notification

The Transport Access Program is a NSW Government initiative to provide a better experience for public transport customers by delivering accessible, modern, secure and integrated transport infrastructure.

Construction of the platform extension is now complete

Transport for NSW is delighted to announce that construction of the platform extension at Millthorpe Station is now complete, bringing the project a step closer to enabling the reinstatement of an on-demand service.

Degnan Constructions has been working on the site since establishment, around four months ago, to ensure the delivery of the new extension which will now provide safe and accessible boarding to trains. The final design, which underwent consultation with the local community, ensured the extension maintained the heritage look and feel of the station as much as possible whilst being structurally sound and safe for customers.

Transport for NSW would like to thank the community for their enthusiasm and patience throughout the design and delivery phases of this project, which will ensure Millthorpe is now even more connected to the wider NSW Trains network.

Completed platform extension at Millthorpe Station

Completed platform extension at Millthorpe Station

Remaining works are on track

There are some operational works remaining prior to the reinstatement of trains stopping at Millthorpe Station, which are currently being completed. These works include new CCTV on the platform extension, a new customer help and information point, and car markers for trains. Train timetables and operations are also currently being modified to ensure that customers can access information about travel and booking a ticket.

These works are on track, and have been scheduled to enable service reinstatement in March 2019. The community will be kept up to date with progress via further community notifications.

Tickets

As per previous community notifications and correspondence, once on-request services are started, tickets will need to be purchased online at least 24-hours prior to the service occurring. Details of where to buy tickets will be provided through community notifications closer to the station's reinstatement.
